Education

Daffodil International University

Bachelor of Science in Computer Science and Engineering

CGPA: 3.75/4.00

Sep. 2021 – Aug. 2025

Ashulia, Dhaka

BAF Shaheen College Dhaka

Higher Secondary Certificate

GPA: 5.00/5.00

July 2017– July 2019

Mohakhali, Dhaka

Experience

Natural Language Processing Research Assistant

May 2024 – Nov 2024

Daffodil International University

Ashulia, Dhaka

- Conducted research on natural language processing with a focus on machine learning and deep learning techniques
- Collected, cleaned, and preprocessed text datasets for model training and evaluation
- Implemented NLP models for tasks such as text classification, sentiment analysis, and language modeling
- Gained hands-on experience with tools and frameworks including Python, TensorFlow, PyTorch, and NLTK

Projects

AI-Powered Quiz Platform | React, Tailwind, Recharts, Gemini, Google Apps Script

Sep 2025 – Oct 2025

- Built an interactive quiz app with timed assessments, dynamic questions, answer tracking, and real-time analytics
- Integrated AI-powered insights, per-question explanations, and custom quiz generation using **Gemini**
- Managed results and historical performance data with Google Sheets and Google Apps Script
- Improved UX with animations, audio cues, smooth transitions, and interactive answer filtering

AI Resume Analyzer | React, TypeScript, Tailwind CSS, Puter.js

June 2025 – August 2025

- Building a web application to analyze and match resumes with job listings using **AI**
- Implementing job posting management and candidate resume uploads for streamlined hiring workflows
- Leveraging AI models to automatically evaluate resumes against job requirements and rank candidate suitability
- Developing the frontend with **React** and **React Router**, integrated with **Puter.js** for data handling and storage

Veltrix E-commerce | React, TypeScript, Tailwind CSS, Framer Motion, Firebase

Feb 2025 – April 2025

- Built a fully responsive e-commerce platform with dynamic product listings and detailed product pages
- Implemented a real-time shopping cart with smooth animations using Framer Motion
- Integrated Firebase to implement secure user authentication
- Designed a clean, performance-optimized UI with intuitive user interactions

Portfolio Website | React, Tailwind CSS, Framer Motion, Formspree

June 2023 – August 2023

- Built a sleek, animated personal portfolio with smooth transitions and motion-driven interactions
- Showcased projects, skills, and experience through clean layouts and optimized UI sections
- Implemented responsive design and performance optimizations for seamless cross-device browsing
- Integrated Formspree to enable a functional and user-friendly contact form

Technical Skills

Languages: JavaScript, Typescript, HTML, Python, C, C++, SQL, Dart
Frameworks and Libraries: React, Node.js, Express.js, Puter.js, Tailwind CSS, SCSS, Zustand
Developer Tools: Git, GitHub, VS Code, PyCharm, Postman
AI/ML & Data Science: NLP, Deep Learning, TensorFlow, PyTorch, scikit-learn, OpenAI APIs
Databases & Deployment: MongoDB, MySQL, Firebase
AI Productivity Tools: GitHub Copilot, ChatGPT, Gemini, Grok, Perplexity AI, Claude

Volunteering & Leadership

Organizing Volunteer **November 2024**

ICPC Asia Regional Dhaka 2024 *Daffodil International University*

- Supported the judge panel, assisted participants, and managed event logistics
- Ensured the smooth execution of one of Asia's most prestigious programming contests
- Strengthened teamwork, problem-solving, and event coordination skills
- Deepened passion for technology and education through active involvement

Interview Board Leader **October 2024**

DIU Job Utsav *Daffodil International University*

- Led interview boards, evaluated candidates, and guided students toward career opportunities
- Strengthened leadership, communication, and decision-making skills through this role
- Gained fulfillment by supporting students in their professional growth and aspirations
- Contributed to an initiative that empowers youth and bridges academia with industry

Research Experience

MRI-Based Multi-Class Classification of Rare Brain Disorders Using Deep Learning **July 2025**

- Developing a deep learning model for automated classification of rare brain disorders from MRI scans
- Applying advanced image preprocessing and feature extraction techniques to enhance model performance
- Leveraging Vision Transformer and convolutional neural networks (CNNs) to improve diagnostic accuracy

Bangla Text Sentiment Analysis Using Supervised Machine Learning **February 2024**

- Developing a supervised machine learning model to analyze sentiment in Bangla text
- Utilized NLP techniques to preprocess raw text data and extract meaningful features
- Evaluating multiple classification algorithms to determine the most accurate model for Bangla sentiment prediction
